# Our history

- Founded: 1972
- In its current form: since 2003
- Specialization in intralogistics and software development
- Internationally active with focus on Europe
- WMS regularly validated by Fraunhofer IML

# Strategy, priorities, objectives

- **KuglerConsulting GmbH** focuses on software development for intralogistics.
  - We offer you our own software products (WMS, reorganization, cockpit) – see also KC's product portfolio.
- We also offer you logistics consulting and logistics-specific IT consulting and management consulting with a focus on:
  - Optimization of business processes in the warehouse and logistics center as well as in the supply chain
  - Use of IT/information technology with interface integration to other business areas in the company and to the supply chain partners
  - Controlling with monitoring and reporting for logistics and company management
  - Collaborative Business: Collaboration within the company across all areas and interfaces and beyond the company with business partners
- The aim of KuglerConsulting is to create integrated solutions with high quality, reliability, efficiency and an excellent cost-benefit ratio for customers.
